Introduction

Hello. I'm Dejan and I'm a multi-talented human. Most of my time I design and build digital products.

You can also call me a product designer, experience designer, interaction, UI, UX or by any other market defined function-title. I'm also a multi-disciplinary maker with over 9 years of experiences in wide range of design disciplines, manager, advisor, entrepreneur, front-end developer, music enthusiast, traveler, photographer and more.

I don't like to define myself by the work I've done. I define myself by the work I want to do. Skills can be taught, personality is inherent. I prefer to keep learning, continue challenging myself, and do interesting things that matter.

Fueled by high energy levels and boundless enthusiasm, I'm easily inspired and more than willing to follow my fascinations wherever they take me. I'm passionate, expressive, multi-talented spirit with a natural ability to entertain and inspire. I'm never satisfied to just come up with ideas. Instead I have an almost impulsive need to act on them.

My abundant energy fuels me in the pursuit of many interests, hobbies, areas of study and artistic endeavors. I'm a fast learner, able to pick up new skills and juggle different projects and roles with relative ease. I like to develop expertise in a number of areas over the course of my life and career.

I'm a people-person with deep emotions and empathy, a natural storyteller. I'm able to inspire and am at my best when I'm sharing my creative expressions with others.

Biography

My journey as a designer started already at the age 14 when attending the High School for Digital communication, design and media. After that I got my bachelor and master's degree in Communication and media studies. This has helped me to widen my range of knowledge and gather experiences through various disciplines, such as front-end development, print design, motion graphics, 3D sculpting and animations, photography, videography, psychology, and many more. Fast forward few years, I'm now focusing on product design, management, research, advising, leadership and entrepreneurship.

My work is something I do with lot of honesty, appetite and commitment. Over the past years I had the opportunity to drive and do hands-on work for some amazing brands from all over the world. My work has also been recognized by some of the biggest names in the industry, like Google, Microsoft, Netflix, PayPal and many more. Beside my freelance career I've also done some hands on work in Switzerland, where I worked as a lead designer for one of the top #3 most downloaded free apps on the German market. After that I become a co-founder and entrepreneur, trying to build my own startup company in Germany.

As part of overachievement, I have been awarded as an awesome Designer #106, have been featured in BNN publication in Japan among some of the best designers in the world and was selected as one of the top 10 designers to follow in 2015. At my university I have been given an award for an outstanding contribution and

have received a second national award, as one of the co-founders developing a desktop application that enables children with special needs to learn independently and play educational games.

I'm currently self-employed and am working with a selected freelance client base. In my spare time you'll find me exploring and traveling the world. I love new adventures, meeting new people and mostly capturing the moments with my Leica. Photography itself can teach us much about visual impression and storytelling as life itself.

Experiences

Product designer and manager

Self-Employed

September 2010 – Present

As a self-employed designer I had a chance to meet and work aside with some of the most talented people across USA, Canada, China, Singapore, Australia, United Kingdom and many more.

My clients where mostly start-ups or small and mid sized companies, where I was being challenged to build the right features for the right people.

I grow as designer, by collaboration, research, advice, managing people and lead teams to bring their product into reality. By focusing on providing solution to a problem or a business need and creating a seamless user experience, the is desirable, unique, sticky and covetable.

InVision

Product designer

January 2016 – 2020

The world's leading design collaboration platform. We help companies of all sizes unlock the power of design-driven product development. That's why teams at Evernote, Adobe, Airbnb, Salesforce, and many more fire up InVision every day.

As a designer I was responsible for building Inspect v1, Craft Prototyping, Craft Manager, Design System Manager and many other product areas across InVision platform.

Centralway

User Interface Designer

September 2013 – May 2014

Lead Designer on the Numbrs app, one of the top #3 most downloaded free apps in Germany.

iTatu d.o.o.

Graphic Designer

September 2010 – August 2011

Skills
